DuroFlexTM

Interchangeable KEEL & HEEL Plugs for Custom Feel

Comes loaded with Spectra Sock in Foot Shell

ISO 10328:2007-P5 APPROVED CERT#Z-08-237-MP-E

Ask Us About the Free 60 Day Trial

The three major articulations within the foot that relate to the mechanics of walking are all covered by the innovative design of the **DuroFlex**. The Subtalar and Midtarsal joints are accurately simulated by the foot's combination of articulating ankle and vertical shock absorption features as well as within the changeable keel & heel plugs. The foot's various metatarsal plugs create a natural toe break point, which allows the foot to roll over the metatarsal heads rather than the tips of the toes. If your patient is looking for a more energy storing foot, we recommend higher durometer plugs to create this feel.

The combinations of features found in the **DuroFlex** are all based on anatomically correct function. When you have a patient try this foot, first have them walk backwards with their current foot, then have them try it with the **DuroFlex** foot and enjoy the comments. The patient will find that the **DuroFlex** will give them a smooth roll-over backwards or forwards.

Each foot comes with a variety of different durometer urethane keel and heel plugs (30, 50, 60 and 85) that are interchangeable. (Factory setting is medium level in the heel and keel). This allows the **DuroFlex** to have custom Energy Storage & Return that can be uniquely tailored to meet the feel of each individual patient.

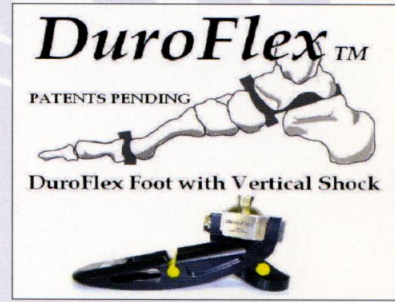

The **DuroFlex** foot is manufactured by APC from lightweight Dupont material **DELTRIN**. This material provides the required durability to withstand years of use. Rated for patient's K-2 to K-4, up to 500 pounds. 3 YEAR WARRANTY!!! Recommended L-Code is 5987

DuroFlex™ Vertical Shock Foot

Recommended L-Code (L-5987)

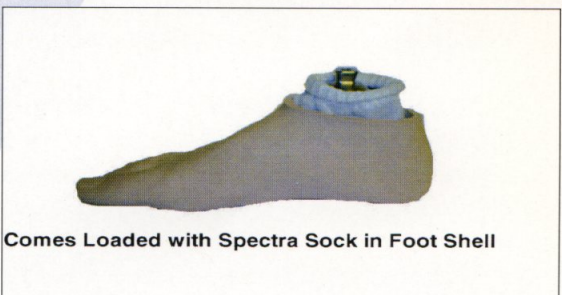

Unique Product Features

- Changeable Keel / Heel Plugs / Superior Energy Storage & Return
- K2 / K4 / INCLUDES Spectra Shell Shield & SHELL
- Extremely Light Weight / No Dead Spot Through Mid-Stance
- Inversion- Eversion / True Vertical Shock
- 60-Day Trial - 3-Year Warranty / Rated up to 500 lbs
