Custom Logo Etching Details

Thank you for participating in our new and innovative custom etching program. We are proud to say we are the FIRST and ONLY manufacturer to offer this truly CUSTOM feature for you. To ensure you receive the highest quality service we would like to highlight a few requirements.

Due to the custom nature of this feature every order is different. Prior to purchasing pylons with logo etching you will need to provide APC with a bmp or jpg image. Please contact your account representative to obtain their email address or call APC and we will provide one. Don't have a file with your logo image? No fear, we have a talented art department that can help. Depending upon the detail involved within your logo, many can be produced from even a fax copy of your letterhead. Please make sure to provide the phone number and any other information in detail with your account representative. Once we have an understanding of what you would like we will produce a sample for approval. Please check and double check the sample, once approved any custom items are not returnable for reason of order error not caused by APC.

Once the sample has been approved your data will be held on file and available for all future orders. Because the part numbers for these custom items are only given to companies participating in the custom etch program, upon ordering the fact that the parts are custom etched as well as color MUST be specified. We have fail safes in place noted in your account, but if not specified at time of order we can't guarantee the custom logos will be etched at time of shipment. Same day shipping is available on most custom orders if received by 3:00 p.m. CST. **Colors Available:** Silver, Blue, Green, Red & Black
